

# Periform<sup>®</sup>+

Intra-Vaginal Probe

The Periform<sup>®</sup> has been the probe of choice for pelvic floor muscle stimulation and biofeedback for many of the worlds leading healthcare professionals for over thirteen years. After extensive user consultation, the Periform<sup>®</sup>+ is refined to improve the exceptional performance even further, whilst retaining the unique, patented and award winning form.

### Unique Indicator Wand

- Visual aid to teach correct pelvic floor exercises
- New push fit
- New extension pieces provide greater amplification of pelvic floor movements to improve visual biofeedback
- Demonstrates benefit of bracing before coughing etc.
- Provides vital information on the efficiency of muscle stimulation

Integrated cables restrict ingress of fluid

Longer cables (additional 12cm)

Patented hollow provides secure 'anchorage' and allows ambulatory use

Electrode backs smoothed over to make it easier to clean

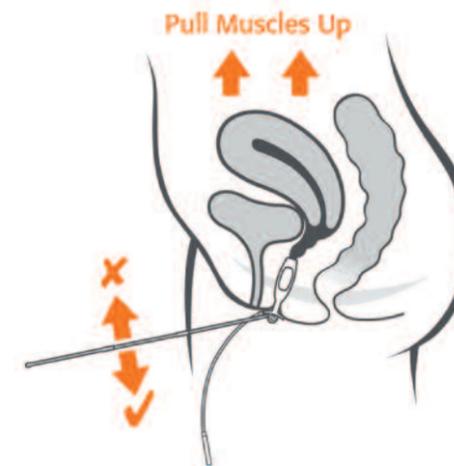

New style neck to allow tissue to take on natural form

### About Periform<sup>®</sup>+

- Can be used with most muscle stimulators and biofeedback equipment (refer to manufacturers instructions before use)
- Single patient use
- Medical grade surgical stainless steel
- Unique 'rectangular' section resists lateral movement
- Contoured electrodes provide comfortable stimulation

### New features:

- New smooth clean shape
- Longer integrated cables
- New push fit indicator wand with extension pieces
