

# Introducing the new *bold* standard CoaguChek<sup>®</sup> Pro II

*When it comes to patient management, the right tool can make all the difference. New CoaguChek Pro II brings simplicity, accuracy, and connectivity together for coagulation monitoring that will impact both clinicians and their patients.*

# Designed for immediate use

The new CoaguChek® Pro II allows you to make a seamless transition to the next generation in patient anticoagulation monitoring.

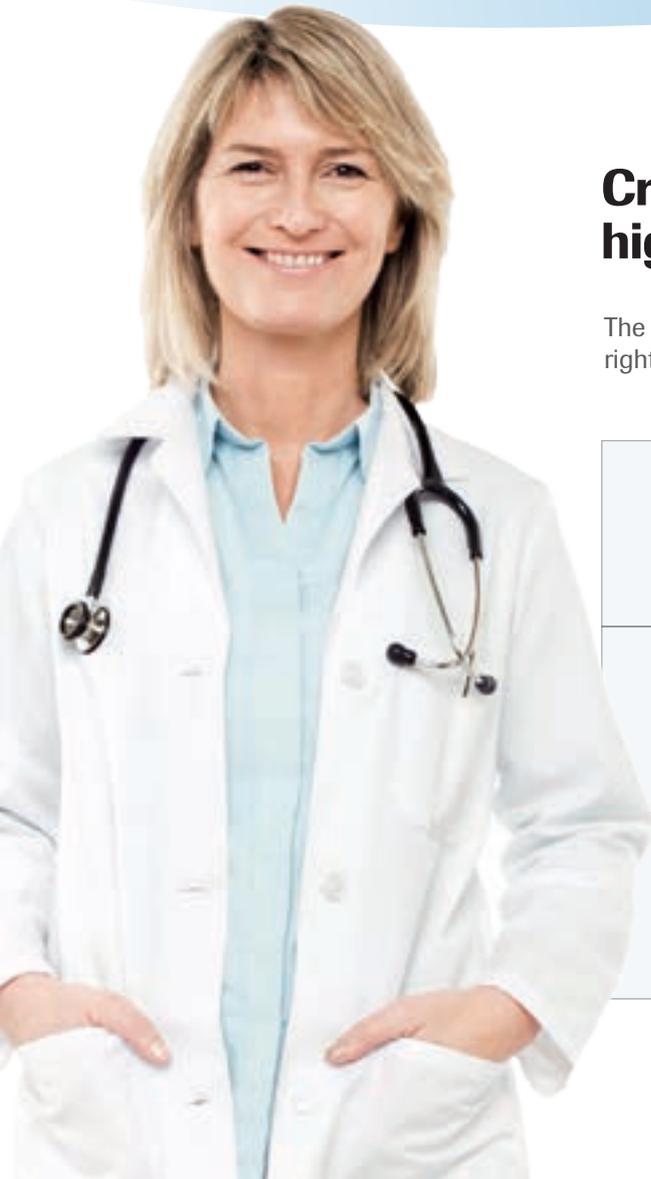

## Simple to implement

Patients and clinicians are immediately comfortable using the new CoaguChek Pro II. Because it is part of the already familiar CoaguChek family, the newly enhanced features are right at your fingertips with minimal training required.

## Simple to use

The new CoaguChek Pro II requires only 1 drop of blood (8µL).<sup>1</sup> And with a user-friendly interface, touchscreen, and built-in 2D barcode scanner, it's ready to fit right into your patient management workflow.

# Creates highly accurate and highly efficient workflow

The new CoaguChek Pro II puts advanced coagulation testing right into your practice.

Lab-comparable accuracy you're used to with CoaguChek

Rapid results in 1 minute<sup>1</sup>

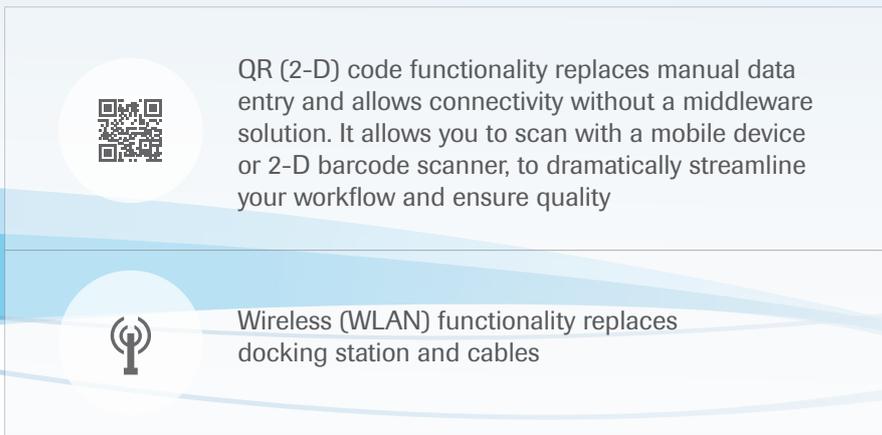

Automatic, built-in quality control checks and two-level liquid control ensure proper compliance<sup>1</sup>

# Enhanced connectivity for today's healthcare needs

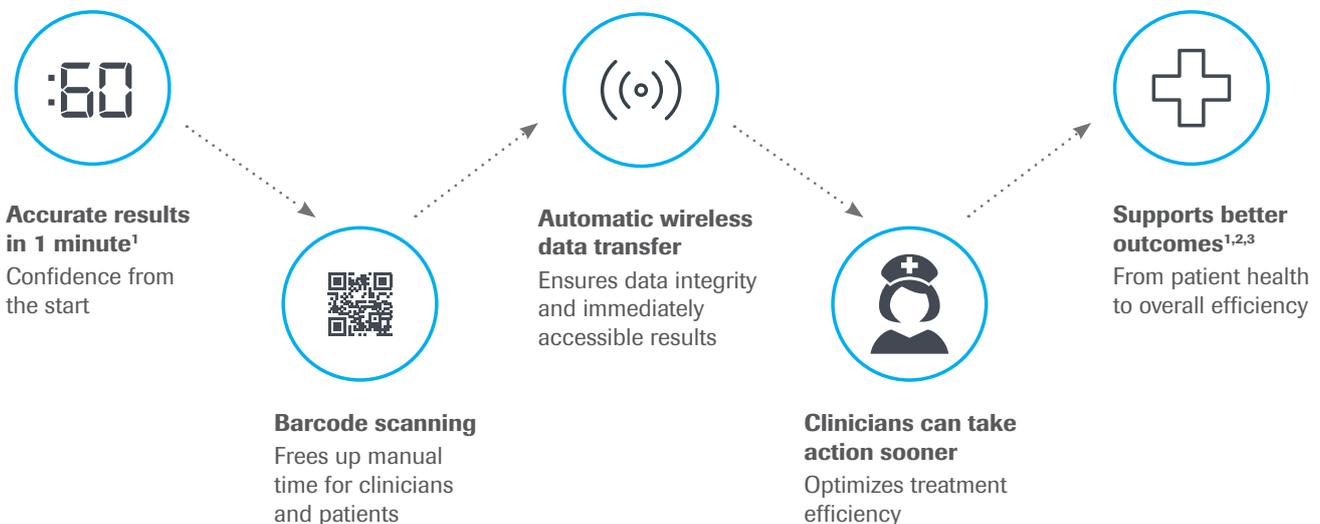

Today's healthcare system requires that clinicians do more with less—and the new CoaguChek Pro II answers that need. Other technologies often create more work and leave healthcare professionals to enter patient data manually. They also may require a docking station or wired LAN connection.

**Experience efficiency like you've never seen before.** Secure transfer of patient health records has just been simplified. Take a look at these powerful technological upgrades:

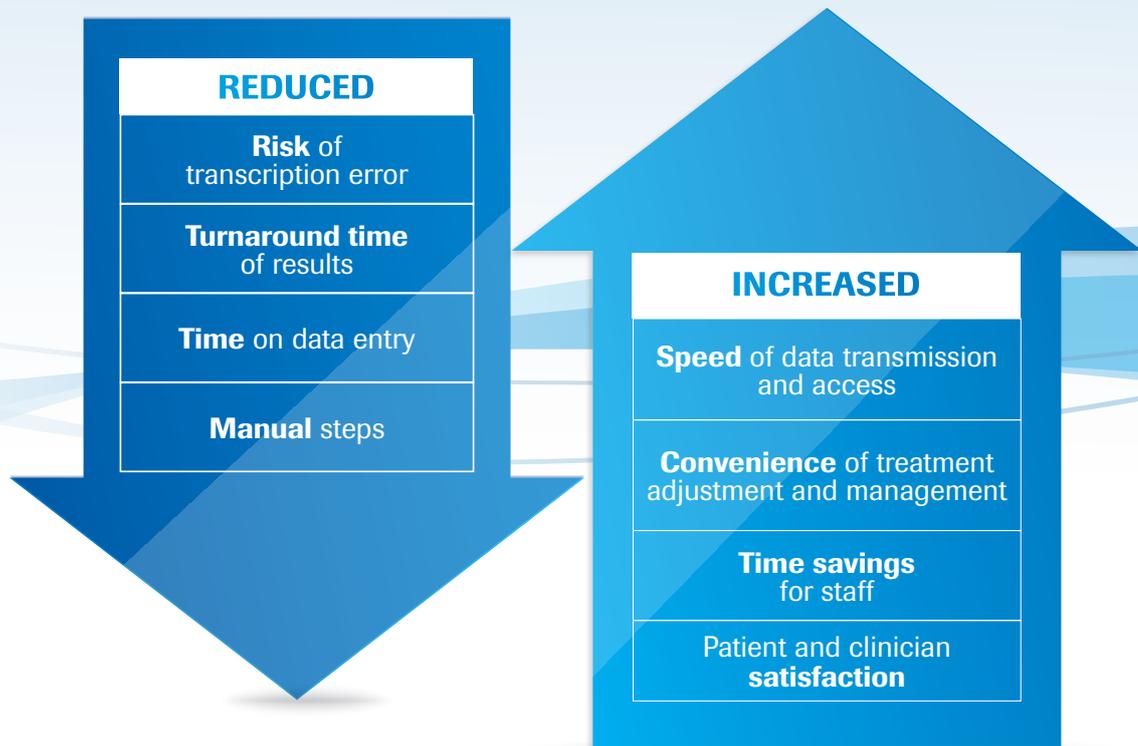

## A vital tool for better patient management

INR monitoring with CoaguChek means patients no longer have to wait for results from labs, which allows you greater ability to test and monitor your patients.<sup>1,2</sup> In fact, more frequent testing has been shown to result in more patients achieving INR stability.<sup>2,3</sup>
